AUTHOR Means, Barbara B.
TITLE Thesaurus of Educational Nonprint Terms.
PUB DATE 15 Jan 85
NOTE 134p.; Prepared by the Media Librarian of the Delaware-Chenango BOCES, Norwich, NY.
PUB TYPE Reference Materials - Vocabularies/Classifications/Dictionaries (134)

EDRS PRICE MF01/PC06 Plus Postage.
DESCRIPTORS Cataloging; *Educational Media; Elementary Secondary Education; *Films; *Nonprint Media; *Subject Index Terms; Thesauri; *Videotape Cassettes

ABSTRACT

This classification system was constructed to provide a controlled vocabulary for current educational nonbook materials, especially films and videocassettes. It is designed to help users catalog nonprint materials in any given subject area and at any grade level easily and quickly. The main arrangement is an alphabetical display of terms followed by their cross-references in a word-by-word alphabetizing sequence. An additional display includes the grouping of the terms under broad subject categories to provide an easy access point to the terms in the thesaurus; this arrangement serves as an informal table of contents to the vocabulary. Terms were collected by consulting "Sears Guide to Subject Headings," "Thesaurus of ERIC Descriptors," "The Film File," "Dewey Decimal Classification," "The Core Media Collection for Elementary Schools," "The Core Media Collection for Secondary Schools," and the film catalogs of a number of New York State BOCES (Boards of Cooperative Educational Services). The acceptability of terms to be included was determined by systematic perusal of film, videocassette, and filmstrip annotations of the Delaware-Chenango BOCES holdings. (Author/THC)

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)."

INTRODUCTION

The "Thesaurus of Educational Nonprint Terms" is a classification system constructed to provide a controlled vocabulary for current, educational, nonbook materials.

The purpose of the Thesaurus is to help users catalog nonbook materials in any given subject area at any grade level, quickly and easily.

The main arrangement of the Thesaurus is an alphabetical display of terms followed by their cross-references in a word by word alphabetizing sequence.

An additional display is that of broad subject categories under which the terms are grouped. This provides an easy access point to the terms in the Thesaurus, serving as an informal "table of contents" to the vocabulary.

TERM SELECTION

Terms were collected by consulting "Sears Guide to Subject Headings", "Thesaurus of ERIC Descriptors", "The Film File", "Dewey Decimal Classification", "The Core Media Collection for Elementary Schools", The Core Media Collection for Secondary Schools", and the film catalogs of a number of BOCES.

The acceptability of terms to be included was determined by systematic perusal of film, videocassette, and filmstrip annotations of the Delaware-Chenango BOCES holdings. Also consulted were textbooks, New York State Curriculum Guides, librarians and subject specialists from Chautauqua BOCES, Cortland-Madison BOCES, and others.

Unused terms are present in the Thesaurus with references from the unused terms to the preferred terms.

CONTENTS

Introduction i

Term Selection i

Term Forms ii

Thesaurus Maintenance ii

Format iii

Sample of Alphabetical Term Display iv

Subject Category Display v

Alphabetical Term Display 1

TERM FORMS

Noun forms were used whenever possible, and gerunds when needed. When modifiers were needed for clarification, they were bracketed and became part of the term.

A Scope Note (SN) accompanies some terms to explain intended use.

Example:
Folklore
SN- Short stories, usually culturally oriented.

In general, the singular form of a descriptor was used for processes, properties and unique things; the plural for classes of things.

Examples are:
(1) Processes: Evolution
(2) Properties: Pollution, Noise
(3) Unique Things: Time
(4) Classes of Things: Fables

THESAURUS MAINTENANCE

In the course of using the Thesaurus, catalogers should note possible revisions and additions. Whenever an appropriate term cannot be found in the Thesaurus to express a needed concept, a new term, along with a definition, should be inserted. These recommendations will be reviewed at periodic intervals. New terms may be considered based on relative frequency of appearance and relationships to previously selected terms. The Thesaurus is computer maintained to facilitate editing, displaying and updating.

FORMAT

The alphabetical display of terms has the most information for each term.

A Scope Note (SN) is a brief statement of the intended usage of a term.

Example:
Political Psychology
SN- Behaviors that lead to a change in a system (or desired change).

The Use (USE) notation guides the user from an unused term to a preferred term.

Example:
Spinal Cord
USE Nervous System

The Used For (UF) reference indicates specific terms that were indexed under a more general concept.

Example:
Film as Art
UF-
Animation
Experimental Films
Films, Experimental

Broader Term (BT) and Narrower Term (NT) were used to indicate the existence of a hierarchical relationship between a general class and its subclass.

Example:
Industry and Technology
BT-
Economics

ECONOMICS
NT-
Industry and Technology
Insurance
Inventions
Labor

A parenthetical qualifier was used to discriminate between identical terms that could otherwise be confused.

Example:
Birth (human)
Birth (pets)

Sample of a single entry in the Alphabetical Display:

ADVERTISING
SN-Persuasive presentation of ideas, goods or services by means of mass media.

UF-
Commercials (TV)
Promotion (deceptive)

BT-
ECONOMICS

This display presents the terms arranged alphabetically under the broad subject headings. This hierarchical display depicts the broader--narrower relationships of all terms in the Thesaurus. As such, it serves as a quick entrance for users into the Thesaurus.
